

Apple REACH SVHC Disclosure

The Registration, Evaluation, Authorization, and Restriction of Chemicals Regulation EC 1907/2006, commonly referred to as REACH, is a European regulation on chemicals and their safe use. With the publication of candidate lists for authorization, the European Chemicals Agency identifies sets of substances of very high concern (SVHC) that manufacturers must disclose to customers if used in articles in their products above 0.1% by weight.

Based on the current version of the candidate list for authorization, Apple products contain the following SVHCs above the disclosure threshold:

As of December 2025, Apple products containing SVHCs above the disclosure threshold of 0.1% by weight in articles are submitted to ECHA's SCIP database. Information about Apple products that contain a REACH Candidate List substance > 0.1% in any article is publicly available on the SCIP database at <https://echa.europa.eu/scip>.
